Raw material Sourcing

- Key raw materials are sourced from multiple suppliers to minimize impact in case of disruptions.
- Strong current inventory position for raw materials.
- Secure adequate amount of raw material for continued business operations for prolonged periods in case of supply chain disruption.
- Understand supply chain impact for raw materials and secure contingency plans from suppliers

Raw material Transit

- Asaclean works with 3PL providers.
- Have obtained business contingency plans for all 3PL providers.
- Not tied to one freight provider.

Material handling at warehouses

- Asaclean has strategic warehousing across North America and works closely with distributors in South America.
- Business
 contingency plans
 have been obtained
 and analyzed to
 ensure warehouses
 are taking adequate
 precautions (CDC
 recommendations)
 to prevent and
 manage COVID.

WIP and Finished goods production

- Asaclean products are produced in several locations in USA and Japan to limit risk.
- All location have business interruption plans and COVID operations plan.
- Sufficient planning has been done to isolate plant resources and also maintain person to person distance on shop floor to prevent spread without compromising plant safety.
- Asaclean prides itself on same day or next day shipment of product. This is achieved by maintaining sufficient levels of inventory.
- Our current levels of inventory are adequate to handle a long shutdown. No shortages of any grades are expected for foreseeable future.

FG storage in warehouse
